MARBLE

Firenze Medicea trae ispirazione dalla pietra Miles di Firenze, risalente al periodo rinascimentale, la cui formazione deriva dall'evoluzione geologica plurimillennaria della catena appenninica. Questa pietra naturale, resasi celebre per essere stata scelta come materiale fondamentale nella costruzione del Palazzo Mediceo - edificio iconico del Rinascimento - non solo è divenuta emblema dell'arte e del potere della dinastia medicea, ma si è trasformata in un simbolo universale del connubio tra autorità e gusto estetico caratteristico dell'epoca rinascimentale.

Porcelain. Elegance. Sustainability

The inspiration for Firenze Medicea derives from Miles Stone, a Renaissance-era material sourced from Florence, Italy, formed through hundreds of millions of years of geological evolution in the Apennine Mountains. Renowned as the core material for constructing the iconic Palazzo Medici – a seminal architectural landmark of the Renaissance – this natural stone not only symbolized the Medici family's fusion of artistry and power but also emerged as an enduring emblem of authority and refined taste during the Renaissance period.

The micro-molding process is used to create a millimeter-level concave and convex texture on the surface of the tile, restoring the ruggedness of the fossils.
